Wart Therapy Instructions

Apply to wart(s) at night

1. Florosal - wait 5 minutes
2. Mediplast - apply the sticky medicated side to the skin
3. Waterproof tape
4. Repeat steps 1 thru 3 every 24 hours (at night)
5. If the area becomes excessively red, irritated or painful, please stop treatment for 2-3 days. Then restart the wart therapy after the irritation disappears.
6. Continue Florosal therapy until return office visit - even if wart appears to be gone.
7. Return for follow-up to treat base of the wart. Florosal will not necessarily eliminate the wart.

ONLY AVAILABE AT CERTAIN PHARMACIES

******PLEASE TIGHTLY SECURE******
